

Evan Stratemeyer

Arlington, MA | 781.658.8872 | evanstratemeyer@icloud.com | [linkedin.com/in/evanstratemeyer](https://www.linkedin.com/in/evanstratemeyer)

Junior seeking a Summer 2026 internship in robotics, aerospace, or manufacturing with an interest in systems engineering — experienced in mill/lathe machining to $\pm 0.001"$, SolidWorks/Onshape/AutoCAD, and hands-on drone, plane, and go-kart builds.

EDUCATION

Boston University , College of Engineering Bachelor of Science, Mechanical Engineering, GPA: 3.30	Boston, MA Expected May 2028
---	---------------------------------

PROJECTS

Machined Tap Holder	Jan 2025 - Apr 2025
----------------------------	---------------------

- Cut both round and square metal stock using horizontal and vertical band saws to create a tap holder that can be used on a mill.
- Milled pieces to be within one thousandth of an inch of design requirements.
- Threaded and cambered pieces using the lathe, meeting design specifications to one thousandth of an inch.

Design Build Fly Competition AIAA Club	Sep 2024 - Apr 2025
---	---------------------

- Designed battery housing for planes, modeled in a collaborative Onshape file.
- Designed mounting plate for latch mechanism to link autonomous drone to larger plane.
- Assembled 3D printed wings using carbon fiber rods as support; implemented servo motors to adjust flaps.

Go Kart Personal Project	Sep 2023 - Apr 2024
-----------------------------------	---------------------

- Led team of two to create Go Kart to drive 30 mph with weight under 200 lbs.
- Modeled frame, steering assembly, and drive system in Onshape.
- Sourced materials from 5+ suppliers, within \$1,000 budget.

Drones Co-Leader	Nov 2022 - Jun 2023
---------------------------	---------------------

- Designed 3+ micro drone templates for new members to use and race.
- Built 5in propeller FPV (First Person View) drone, researched parts, mechanics, and self-taught soldering.

Additional Projects: Rubik's Cube, Truss Analysis Program, Balloon Propulsion Car, Marble Run, Board Game

RELEVANT EXPERIENCE

Senior CAD Instructor	Sep 2023 - May 2024
------------------------------	---------------------

- Co-led team of 8 seniors across 5 classes to run classes, prepare lessons and assist with class projects.
- Managed 3+ 3D printers and oversaw team-based events such as CO2 car competition and design & build contest for first year students.

SKILLS

Technical Skills: SolidWorks, AutoCAD, Onshape, Python, MATLAB, MIG Welding, Soldering, 3D Printing, Laser Cutting/Engraving, Metal and Wood Fabrication, and Precision Manufacturing

LEADERSHIP & ACTIVITIES

Quechee Ski School , Head Ski Instructor	Dec 2021 - Present
---	--------------------

- Taught private and group lessons to kids ages ranging between 3-14 years old.

Rocket Propulsion Group , Member	Sep 2025 - Present
---	--------------------

The Quechee Club , Tennis and Golf Coach	Jun 2020 - Aug 2025
---	---------------------

- Coached junior golf team, junior tennis camp, and junior tennis team.
- Taught private lessons managing 10+ clients a summer, gained clients through word of mouth.

American Institute of Aeronautics and Astronautics , Member	Sep 2024 - May 2025
--	---------------------

Vermont Institute of Natural Science , Leader in Training	Jul 2022 - Aug 2023
--	---------------------

- Volunteered 120+ hours over 2 summers running lessons and managing day camp groups.
- Kept kids calm and safe during wildlife demonstrations and aided caretakers with demonstration set up.
